because to err is human

Welcome to the *Snopake*® brands 2023 catalogue

Our History

Our roots go back over 65 years to 1955, when Snopake, one of the world's first correction fluids, was introduced by the Battelle Institute of America. In 1988, we developed the first, hard wearing polypropylene filing product to the stationery market and Snopake Ltd was born. This was successfully followed in 2005 by Swordfish, a range of high quality but affordable Paper Shredders, Paper Trimmers, Pencil Sharpeners, Laminators and, more recently, Electrical Accessories.

Over 100 years of Platignum

2020 marked over 100 years of Platignum. Starting in 1919 as Platignum Pen Co. the world of pens changed with the self-filing gold plated nib fountain pen. Platignum then created the retractable ballpoint in 1950 and has continued its innovative streak with a range of ball point and fountain pens.

Over 100 years on, Platignum continues to write the history of the pen.

Today

From our Head Office in London, and distribution centre in Suffolk, we market our products in over 70 countries. We believe in excellence and practise a continual process of improvement and innovation. Our business is built on integrity. We follow clear ethical guidelines and strictly enforce them throughout the company. Our culture is defined by an entrepreneurial spirit that is pervasive and global. We encourage our people to make an impact, to take action and responsibility.

Our Products

We are passionate about our products; we thrive on superior product innovation and never compromise on quality. Our products are backed by guarantee and have been manufactured to the highest standards so that they remain cost effective purchases over the longer term.

Sustainability

Snopake Brands recognises its responsibility to conduct business in a way that protects the environment. We believe we have an important duty to ensure good environmental performance in all our business operations and to provide the necessary organisation, commitment and training to fulfil this obligation. The management firmly believes in, and is committed to, monitoring and improving environmental performance, pollution prevention and environmental protection.

At Snopake we never compromise on quality and have you, our customer, to thank for the success of this Company. If however, you haven't chosen a Snopake Brands product previously, try us - put us to the test.

What makes a Snopake product stand out from the crowd?

Six decades down the line, Snopake products are recognised as the market leader in polypropylene filing, storage and presentation products and clearly lead the way in the office product sector.

The brand's main product focus is to develop high quality, functional, affordable but trusted products for everyday use. The Snopake portfolio ranges from desk-top essentials such as sticky notes, glue and correction through to display books, ringbinders and filing & storage products.

Today, with the age of technology, one wonders whether correction products are still required but, in fact, our correction products are still used for correcting hand-written mistakes in the office, at school or at home.

Each product is meticulously created, details such as extra strength, durability of the product, unique Snopake features, such as closures and indexing, are thought through at every stage of the development process. We listen to our customers, because it's important, but also because we want our customers to enjoy the Snopake experience.

Because we truly believe in our products, each filing or storage product has a product promise guarantee of between 2 to 10 years. Before going to market, each Snopake product must pass the 5 Step Fitness Test to ensure they are not only fit for purpose but, most importantly, last longer than their product promise guarantee. Each product is tested for strength, durability, usability, affordability and sustainability before it is deemed fit for purpose and awarded the Snopake product promise guarantee.

Our best selling product is the Snopake Polyfile. Launched in 1995 as an alternative to the manila folder, our data shows that a Polyfile is sold every 6 seconds somewhere in the world. Available in sizes from DL, A5, A4, Foolscap and A3, the Polyfile comes in Clear, Classic, Electra, Fusion and more recently in Rainbow colours. Featuring a press stud closure to keep contents secure, and a handy indexing system unique to Snopake, each Polyfile carries a product promise guarantee of 5 years!

Snopake celebrate over 60 years of dedication, pride, perfection and success. We hope you'll join us as we continue our journey, our continued commitment to quality, our dedication to innovation but, above all, our commitment to you, our customers.

Product Information

ENVIRONMENTAL TERMS

Biodegradable

Biodegradable materials are capable of being decomposed by natural processes. The ability of a material to biodegrade depends largely upon its molecular structure. When disposed of, some materials degrade in only a few weeks, while others take several months or even years.

Recycled

Recycled materials have already been used before and renewed for further use. At Snopake, we only ever describe products as recycled if a significant proportion of the material has been used before.

Recyclable

Recycling is the process of converting waste materials into new materials and objects. It is an alternative to waste disposal that can save material and help lower greenhouse gas emissions. Recycling can prevent the waste of potentially useful materials and reduce the consumption of fresh raw materials, thereby reducing: energy usage, air pollution and water pollution.

At Snopake we only ever describe products as recyclable if a significant proportion of the material is recyclable.

MATERIALS

PP

Polypropylene is made from propylene and ethylene – two waste products of the oil and gas industry. Until the invention of polypropylene, these waste products were simply burnt as they had no commercial value. Today, polypropylene is one of the most widely used plastics in the world it is robust, extremely durable, water resistant and recyclable.

LDPE

Low density polyethylene is a lightweight thermoplastic made from the monomer ethylene. Flexible, moisture-resistant and recyclable.

EVA

Ethylene vinyl acetate is the copolymer of ethylene and vinyl acetate. It's an extremely elastic material that produces materials which are rubber-like in softness and, yet with excellent toughness and flexibility. The porous elastomeric material is three times as flexible as low-density polyethylene and is a recyclable material.

EPPE

EPPE means **EVA+PE+MPE**. It is one of the synthetic polymer chemical materials that are between PE and EVA material. EPPE has a high transparency, high softness and toughness and a low temperature resistant (-50 degree). It is non toxic, phthalate free, pollution-free and a recyclable material.

FSC®

All our paper products carry the FSC® logo to show that their materials came from sustainable forests.

A-Z of Product Icons

Unique Snopake guarantee

The weight of usable product in grams

Can be used for organising and indexing documents

The capacity of the product

Washes out at 30 degrees

Write-on label on spine for personalisation and titles

The volume of usable product in millilitres

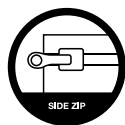

This is suitable for children over 36 months

Allows you to insert your own leaflet or design to appear as the front cover

Indicates a gusseted design to allow for expansion and greater capacity

Allows for better organisation of items and documents whilst travelling

The product is A3 and can fold to A4

Double-sided for maximum usage

Seams are double-welded for ultimate strength and security

Features a strong hanging loop

Complete with a dry wipe pen

Recyclable LDPE to protect the environment

Made from an environmentally heavy duty material and designed to last

Complete with a hanging hook for ease

Recyclable PP to protect the environment

Unaffected by water and can be used in wet environments

Colours & Finishes

Electra

The Snopake signature colour range that includes stunning green, turquoise, purple, pink and blue colours.

Classic

A popular and timeless range of more subtle colours including blue, yellow, green, red and clear.

Polka Dot

An exciting range of stunningly bright colours including pink, teal, blue, orange, purple, green, red and light yellow.

Fusion

An elegant range of fashion led colours including Burgundy, Smoke, Emerald, Indigo and Plum.

Neon

A range of extremely bright or fluorescent colours, which can include yellow, green, pink, orange, blue and purple.

Superline Emboss

The majority of Snopake polypropylene products have a Superline emboss - this attractive finish has a professional look and feel.

Zeon

A collection of fabulous metallic black, blue, graphite, green and red colours.

Bright

A range of bright colours which include green, pink, purple, white and yellow.

Lite

A combination of unique light colours which include parchment, light blue, dark blue, pink and purple.

Rainbow

A wonderful combination of striking colours which include blue, orange, green, red, purple and yellow.

Pastel

A splendour of soft pastel hues which include blue, pink & green.

Frost Emboss

A frost emboss is ideal for regularly handled products as it is smooth to the touch, providing added comfort.

NOTES & TABS

Snopake Notes and Tabs are a must have in the home, school or workplace. From leaving reminders on desks or around the home, it's always useful to have a pad of Snopake Sticky Notes to hand.

Each Sticky Note is produced to Snopake's highest standard, ensuring you get the best possible product. Our Sticky Notes can be easily removed whilst retaining their stickiness, so you can reposition them over and over again.

Our brightly coloured Index Tabs are also an essential accessory, from highlighting text to revision page marking to emphasising those small yet important notes, our range of Index Tabs are handy to all.

Index Tab Arrow Highlighters

AirBag

Since November 2006, European Legislation demands that liquids carried on board an aircraft must be packed in a clear, resealable bag, approximately 20 x 20cm in size.

- Snopake Airbag meets the requirements of this legislation.
- The legislation affects all European flights and has been adopted at many international airports
- Made from tough, long-lasting flexible material
- With smooth action plastic closure and metal slider

POLYFILES

The Snopake Polyfile, launched in 1995, is the original envelope-style popper-wallet - it's often copied but never excelled. Snopake Polyfiles are made from tough polypropylene, much stronger than the material used by many competitors, and the press-stud closure is engineered to last.

Snopake Polyfiles are ideal for securing all your important documents, photographs and artwork, whether at home, in school or the workplace.

Uniquely, only Snopake Polyfiles have double-welded seams, making them the toughest files of this type available - anywhere! The Snopake Polyfile is durable, elegant and resourceful - it's no wonder one is bought every 6 seconds!

The Polyfile is available in a wide choice of clear, vibrant and soft clear pastel colours, designed to suit your every need.

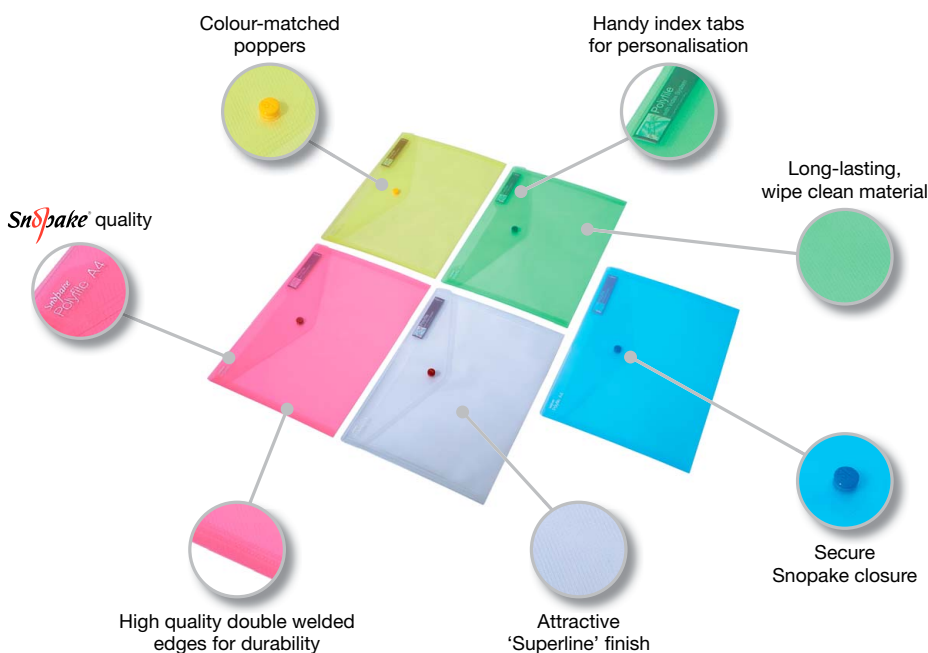

The Classic and Clear Polyfile range feature an indexing system - unique to Snopake, allowing you to label each Polyfile for easy identification. This is yet another Snopake innovation - you won't find this on any similar-looking files.

Polyfile

The Snopake Polyfile was launched in 1995, as a tough, elegant and environmentally-friendly alternative to the manila folder. Manufactured from tough, long-lasting polypropylene, it is easy to wipe clean and is available in an array of vibrant colours and soft clear pastels. Complete with a coloured press-stud that ensures that documents stay safely inside the folder.

Did you know that a Snopake Polyfile is bought somewhere in the world every 6 seconds?

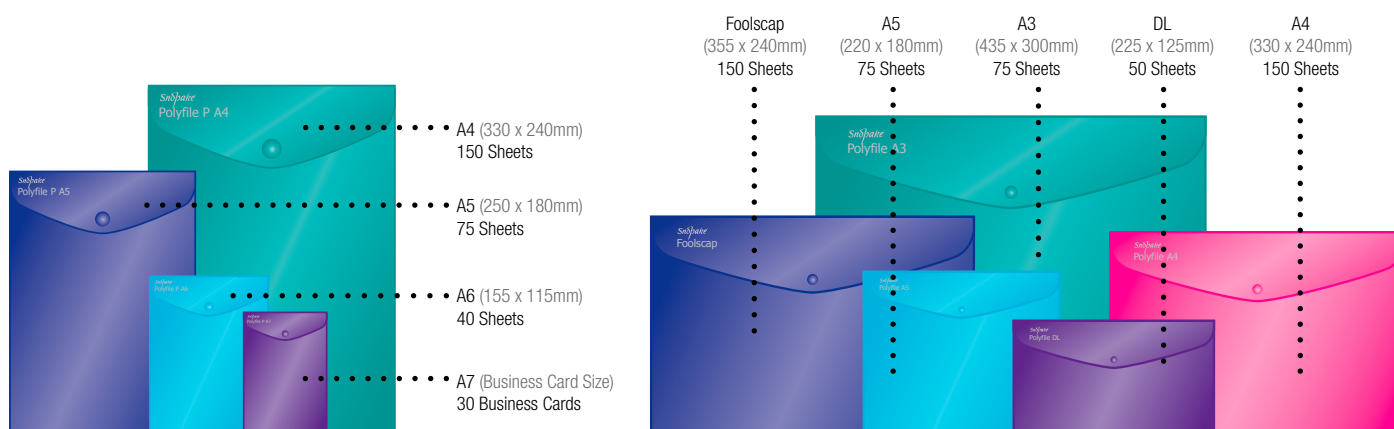

Available in sizes from A7 to A3, there is a Polyfile to meet all needs - from storing documents, artwork, CD's and photographs to holding business cards.

We've done it again!

Now after 22 years of global success, there's a new Polyfile. Unlike any other, the seams are double-welded for ultimate strength and security.

Polypropylene is one of the most widely used plastics in the world it is robust, extremely durable, water resistant and recyclable.

The Unique Snopake Indexing System
(Clear and Classic only)

Clear and Classic Polyfiles in A4, Foolscap & A3 feature a handy indexing system, unique to Snopake.

Polyfile

- Features a press-stud closure to keep the contents safe and secure
- Strong polypropylene material with an attractive superline emboss
- Available in a wide choice of popular Classic, Clear or stunning Electra colours
- Clear and Classic Polyfiles feature a handy indexing system, unique to Snopake

NOTEBOOKS & DISPLAY BOOKS

SnoSpake Display Books are sure to impress in any circumstances. The versatility of our display books means they can be used for presentations, for interviews, for filing contracts but can also be used around the home for storing menus or important household documents in an easy to read format. Made from tough polypropylene, our display books have wrap around spines for easy identification and labelling as well as a variety of pocket sizes. We actually have display books that are A5 and A4 in size but can store A4 and A3 paper - that's what we call flexibility!

RINGBINDER ACCESSORIES

Snopake offers a vast array of RingBinder accessories that are designed to suit virtually any RingBinder or lever arch file. They are available in portrait or landscape, in a variety of colours & sizes and the reinforced, multi-punched edge suits most binding mechanisms.

Every accessory is made from top quality, high strength polypropylene and offers long term protection for your documents or assistance in retrieving those all important documents.

Unlike other brands, Snopake's Polyfile Wallets are double-welded for extra strength and greater durability – another first from Snopake!

EXPANDING FILES & ORGANISERS

Snpake offers a complete range of Expanding Files & Organisers that are suitable for use on your desktop, carrying around or even for use when travelling.

Unlike other desk organisers, Snpake manufactures its products using thick and long-lasting polypropylene providing you with robust and durable business stationery, without compromising on design and style.

Each Expanding File & Organiser is available in landscape or portrait orientation, different sizes, colours, expanding sections, or with/without carry handles, tailored to suit your every need.

Swordfish

tried & tested technology

What's so special about Swordfish products?

At Swordfish we like to keep things simple. That means simple to choose, simple to use, machines that simply get on with the job. We don't add complications – and cost – by adding unnecessary features, but we do use tried and tested technology that you can rely on. That's the core Swordfish philosophy.

Whether you are looking for a shredder, laminator, pencil sharpener, paper trimmer or electrical accessory, you will find that Swordfish offer a wide range of products, each with different characteristics, so there is bound to be one that meets your needs – exactly. Then we make it easy for you to choose the right product by publishing the most comprehensive set of specifications in the industry.

Nobody gives you more information than Swordfish. But again, we keep it simple. We don't baffle you with technical specifications – we tell you exactly what you need to know, such as the number of sheets a shredder can shred in an hour, or the actual time that each laminator takes to seal an A4 document. We even say which pencil sharpener gets the best results with different types of pencil.

Take a look at the product specification grids on pages 103-119 and you will see how simple it now is to choose the best product for your needs – and your budget.

When you come to use your new Swordfish machine, you will find that's simple, too. We provide simple, easy to follow instruction manuals and our machines have simple, easy to use controls. So – simple to use, simple to choose.

Simple machines that simply get the job done. That's Swordfish. But what happens when things go wrong? Fortunately, that doesn't happen very often. We go to great trouble to make sure that our products are designed for reliability and long life. That's why we are able to confidently offer a two-year guarantee across the Swordfish range. But should the worst happen, you'll find that our on-line warranty claim system is (at the risk of being repetitive) very simple. Because we want you to be up and running again as quickly as possible, with the minimum of fuss.

Swordfish. Making it easy by keeping things simple.

Brighten your workspace with smart design and exciting colours

Office machines don't have to be dull and boring! Bright, metallic colours and ground-breaking designs set these new signature products from Swordfish apart from the rest.

We have enlarged our range of coloured products with the introduction of two new Creative Trimmers in a distinctive purple and white livery. Our remarkable travel adapters are now available in a greater choice of colours and we have expanded our popular range of pocket pencil sharpeners in vibrant, fashionable colours. Many of these new sharpeners, and the VariPlug travel adapter, also have a soft-touch finish, so they don't just look good, they feel good, too.

tried & tested technology

PAPER SHREDDERS

Our Swordfish shredders, whether used at home or in the office, are the most secure and convenient way to dispose of your documents.

With the ever-growing concerns surrounding data security and fraud, you can never be too careful. Our fine-cut shredders ensure your confidentiality and protect your identity, while ensuring GDPR compliance.

From occasional use at home, to continuous use in the office, the different specifications and capabilities of Swordfish's shredder range make it easier to find the right shredder for you.

Swordfish micro-cut shredders offer the advantages of enhanced security and quiet operation. A further benefit is that they cut so fine, their bins require less frequent emptying than cross-cut shredders.

Cross-Cut Shredders

tried & tested technology

600XC-P4

6-sheet Cross-Cut

- Cuts an A4 sheet into approx. 446 pieces
- Shreds approx. 160 sheets per hour
- Easy-lift head for simple, mess-free emptying
- Shreds credit cards and small staples
- Security rating P-4 + E-3 (see p.77)
- Recommended for sensitive & confidential data

Code: 40357

800XC-P4

8-sheet Cross-Cut

- Cuts an A4 sheet into approx. 446 pieces
- Shreds approx. 220 sheets per hour
- Easy-lift head for simple, mess-free emptying
- Shreds credit cards and small staples
- Security rating P-4 + E-3 (see p.77)
- Recommended for sensitive & confidential data

Code: 40361

800XC 8-sheet Cross-Cut

- Cuts an A4 sheet into approx. 400 pieces
- Shreds approx. 335 sheets per hour
- Easy-lift head for simple, mess-free emptying
- Shreds credit cards and small staples
- Security rating DIN P-4 + E-3 (see p.77)
- Recommended for sensitive & confidential data

Code: 40230

X-SECURIA 800XC 8-sheet Cross-Cut

- Cuts an A4 sheet into approx. 330 pieces
- Shreds approx. 370 sheets per hour
- Slide-out waste bin
- Shreds credit cards, paperclips and small staples
- Security rating DIN P-3 + E-2 (see p.77)
- Recommended for sensitive & confidential data

Code: 40300

tried & tested technology

1000XC-P4 EL

10-sheet Cross-Cut

- Cuts an A4 sheet into approx. 446 pieces
- Shreds approx. 300 sheets per hour
- Easy-lift head for simple, mess-free emptying
- Security rating DIN P-4 + E-3 (see p.77)
- Recommended for sensitive & confidential data

Code: 40364

1000XC

10-sheet Cross-Cut

- Cuts an A4 sheet into approx. 400 pieces
- Shreds approx. 600 sheets per hour
- Slide-out waste bin
- 4 castors for easy mobility
- Security rating DIN P-4 + E-3 (see p.77)
- Recommended for highly sensitive & confidential data

Code: 45009

1000XC Plus 10-sheet Cross-Cut

- Cuts an A4 sheet into approx. 470 pieces
- Shreds approx. 555 sheets per hour
- Slide-out waste bin
- 4 castors for easy mobility
- Security rating DIN P-4 + E-3 (see p.77)
- Recommended for highly sensitive & confidential data

Code: 40347

Protect your data and ensure GDPR compliance by using Swordfish's tried & tested technology.

The General Data Protection Regulation replaces the EU's 1995 Data Protection Directive, and came into force on the **25th May 2018**.

It has been developed to strengthen and unify privacy rights and data protection for individuals within the European Union while streamlining the data protection obligations of businesses serving EU citizens through a single Regulation instead of 28 different National laws.

The Regulation requires organisations of all sizes to adopt a new set of processes and policies aimed at giving individuals greater control over their personal records and apply sound security practices to both electronic and paper-based data (failure to do so could result in massive fines of up to £20m or 4% of annual global revenue – whichever is greater.) Much of this will involve writing new processes and manuals, retraining staff and updating systems to accommodate these new procedures. Other steps involve practical measures, such as having a clear data protection and shredding policy.

By shredding documents, organisations reduce the risks of non-compliance and all the implications thereafter. The simplest way to think about protection is to ask if you are holding onto customer information. Be it paper records or data media such as CD-ROMs and Chip Cards, these are all potential areas where confidential information could be compromised.

Reducing sensitive paper documents into non-legible particles will lessen the risk of personal data breach. As shown in the table below paper shredding levels range from basic P-1 to the most secure P-7. The P-6 & P-7 levels tend to be used by government and defence sectors for the most confidential documents, however, commercial organisations are increasingly using P-4 & P-5 level shredders to reduce the risks of data breach. These shredders are capable of turning an A4 sheet into an incredible 400 & 2,000 separate tiny pieces.

Swordfish tried & tested shredders help you to protect the identity and confidentiality of your customers and dispose of your sensitive and confidential data in a secure manner while ensuring compliance to the paper security requirements of GDPR.

DIN 66399 security levels for paper documents, optical media and electronic data

Classification according to DIN 66399	PAPER		OPTICAL MEDIA		ELECTRONIC DATA CARRIERS	
	Class Level	Particle sizes according to DIN 66399	Class Level	Particle sizes according to DIN 66399	Class Level	State after destruction
... that the data on it can be reproduced without special tools or skills but not without a certain amount of time expenditure Recommended e.g. for Data Carriers containing general data which needs to be rendered illegible.	P-1	Material particle area max. 2,000mm ² or strip width max. 12.0mm strip length unlimited	O-1	Particle size max. 2000 mm ²	E-1	Medium mechanically / electronically inoperable
... that the data on it can be reproduced with tools and only with a certain degree of effort Recommended e.g. for Data Carriers containing internal data which needs to be rendered illegible	P-2	Material particle area max. 800mm ² or strip width max. 6.0mm strip length unlimited	O-2	Particle size max. 800 mm ²	E-2	Medium disintegrated
... that the data on it can be reproduced only with considerable effort (personnel, tools, time) Recommended e.g. for Data Carriers containing sensitive and confidential data	P-3	Material particle area max. 320mm ² or strip width max. 2.0mm strip length unlimited	O-3	Particle size max. 160 mm ²	E-3	Medium disintegrated and max. particle area 160mm ²
... that the data on it can only be reproduced using non commercially available or specially designed devices Recommended e.g. for Data Carriers containing highly sensitive and confidential data	P-4	Material particle area max. 160mm ² and for regular particles: max. strip width 6.0mm	O-4	Particle size max. 30 mm ²	E-4	Data carrier (chip) disintegrated and max. particle area 30mm ²
... that the data on it is unlikely to be reproduced given the current level of technology Recommended e.g. for Data Carriers containing data which needs to be kept secret	P-5	Material particle area max. 30mm ² and for regular particles: max. strip width 2.0mm	O-5	Particle size max. 10 mm ²	E-5	Data carrier (chip) variously destroyed and max. particle area 10mm ²

tried & tested technology

Prolong the life of your Shredder

As with all types of machinery, document shredders will not operate efficiently unless properly maintained. The most effective way to care for a shredder is to oil it regularly.

Oiling is an essential part of shredder maintenance. It helps to maintain maximum performance and is necessary in order to maintain warranty coverage.

Shredding produces a surprising amount of paper dust which builds up inside the cutting assembly. Without frequent oiling, the accumulated detritus compacts, putting strain on the cutters, motor, gears and bearings. Failing to oil a shredder will inevitably reduce its lifetime.

Shredders should be oiled on a regular basis and before any period of intensive shredding.

Lubrication should always be done when the shredder is cold. Never add oil to a hot shredder. Never use oil from an aerosol as the propellant may be flammable. Always use oil designed for use in shredders.

Swordfish Shredder Oil comes in two handy varieties to suit your model of shredder and the frequency at which it is likely to require oiling.

Scan here to find out more about lubricating your shredder

Shredder Lubricant Sachets

- Pack of 12 Sachets
- For use with all types of shredders

Code: 40015

Shredder Oil Lubricant

Code: 40240 (350ml)

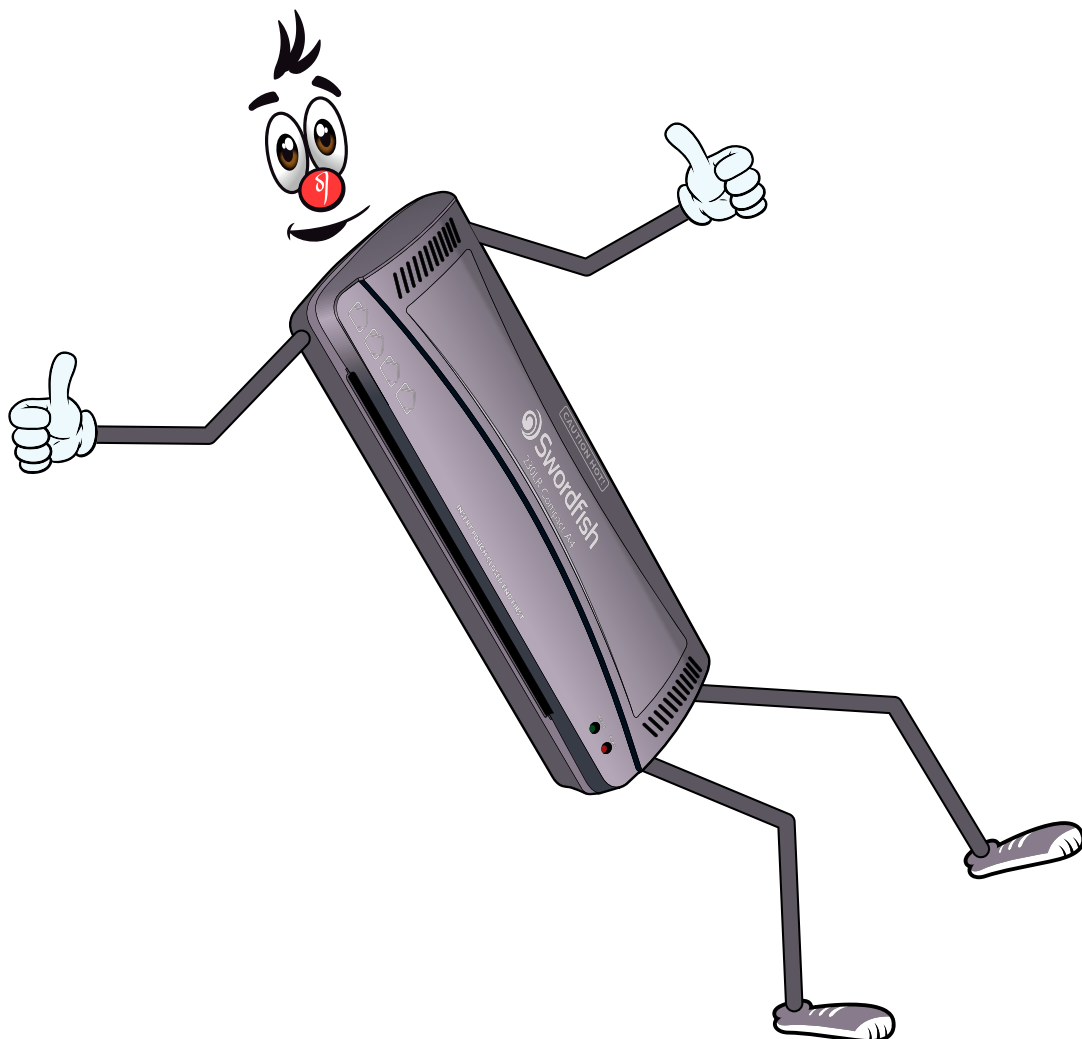

LAMINATORS

Here today. Here tomorrow! Lamination protects documents by permanently encapsulating them between two sheets of plastic – the laminating pouch. This preserves the life of your document as once sealed, documents are protected against handling, water, grease and finger-marks. If your lamination becomes dirty, simply wipe it clean.

Whether a photograph, important presentation material or children's artwork, lamination will enhance the colour in the document, preserve it and make it more attractive.

To achieve a professional result, you can always count on Swordfish's high quality laminating pouches, available in a full range of thicknesses and sizes along with Swordfish's long lasting Laminating Pouch Carrier to laminate non-standard shapes, sizes or materials.

Swordfish range of laminators includes feature-rich models for all users, from hobbyists to professionals, capable of laminating documents up to A2 size, all designed to make lamination simple, straightforward and trouble-free.

Armoured Pouch Carriers

- Available for documents in A4 and A3 sizes
- Superfine PTFE-coated woven glass fibre
- Thermally efficient for perfect heat transfer
- Essential when laminating cut-outs
- Durable and long-lasting
- Supplied in a robust storage tube - ideal for storage

Description	Product Code	Trade Pack	Outer Packs
A4 Armoured Pouch Carrier 230 x 343mm	40353	Pack of 1	50
A3 Armoured Pouch Carrier 320 x 480mm	40354	Pack of 1	50

Jammed pouches will cause frustration and can cause serious damage.

Lamination pouches need the support of paper across their entire area. If they do not have this support, the pouch can easily jam. If you want to laminate cut-outs, irregular shapes, undersized items, using a pouch carrier will help prevent jams and protect your laminator from damage.

Multiple Items

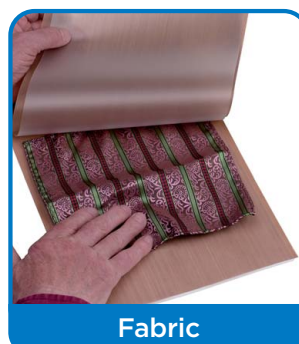

Irregular Shapes

Undersized

Newspaper

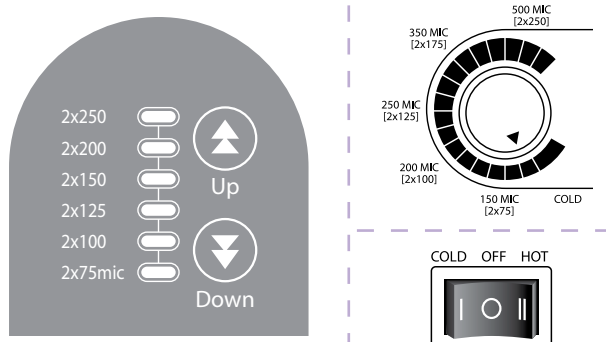

Fabric

Here are some hints that will help you get the best results from your Swordfish Laminator

1

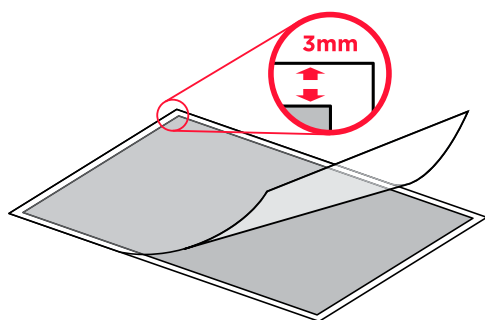

Set the machine to the correct temperature for the pouch in use. Pouches come in a range of thicknesses – the thickness of your pouches will be marked on their packaging.

Setting the temperature too low will produce poor lamination. Setting it too high could cause the pouch to jam in the machine.

2

Make sure that the item to be laminated completely fills the pouch, leaving **no more** than a 3mm border around the edges.

Leaving a wider border can cause the pouch to jam because it needs to be supported across its entire area, as the heat in the machine could otherwise cause the pouch to soften and droop.

3

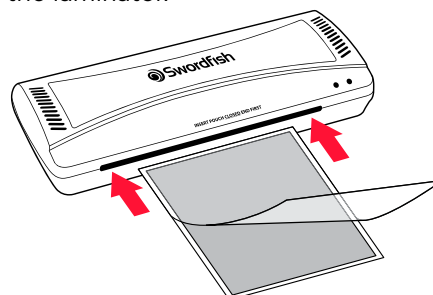

Laminators are designed to laminate paper or thin card.

They are not suitable for fabric, tissue paper etc as soft materials provide insufficient support to the pouch.

4

Always insert a pouch closed end first into the laminator.

If you put a pouch in open ended first, or sideways, you will almost inevitably cause the machine to jam!

5

Never attempt to laminate cut-outs, several small items within a larger pouch, leaves or organic materials, damp documents, stamps etc.

Make sure inkjet prints are completely dry before attempting to laminate them.

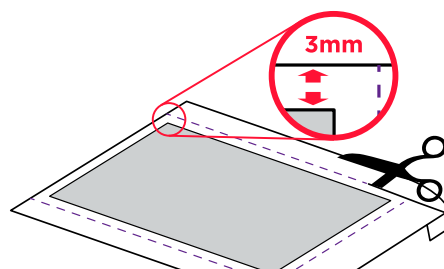

Incompletely loaded pouches can cause a jam. If you absolutely need to laminate a collection of small items in one pouch, you must use a carrier.

Moisture in the paper being laminated will evaporate, causing the pouch to bubble.

6

If the item to be laminated is smaller than the available pouch, simply trim the pouch to size before feeding it into the machine.

To prevent jams always fill your pouch correctly leaving no more than a 3mm border around each edge.

7

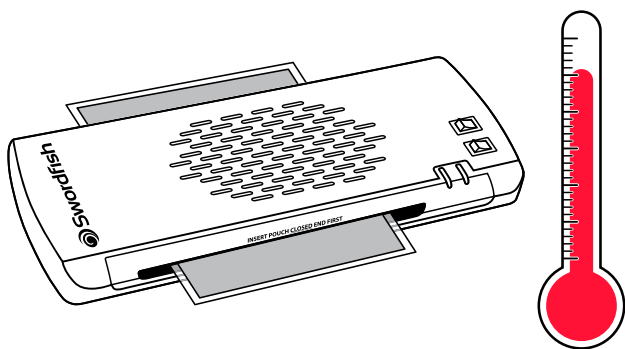

Never attempt to laminate thermal prints or pictures produced with wax crayons.

The heat inside the laminator will have an adverse effect on temperature sensitive materials. The image on a thermal print will degrade, wax crayons will melt.

8

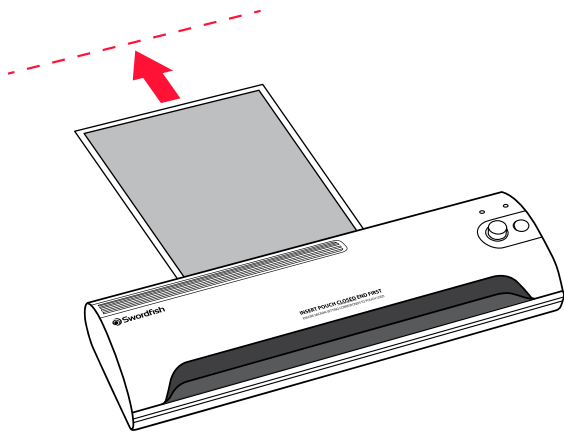

Be aware that the surface of your laminating machine may become hot during use.

Children must have adult supervision. Take care.

9

Make sure there is enough space behind the laminator to allow the pouch free passage through the machine.

The laminated pouch will be warm as it exits the machine. It needs to cool down lying flat in order to avoid wrinkles.

10

Never leave your laminator unattended whilst it is in use. Always watch to make sure that the pouch exits the machine. The leading edge of the pouch should start to emerge before the trailing edge enters the machine.

This check will enable you to release a jam, before it causes damage to the machine. We strongly recommend that you use Swordfish, or similar high-quality branded pouches, as inferior grade pouches give poor results and can cause permanent damage to your laminator.

11

Simple maintenance on a regular basis will clean rollers by absorbing and surplus adhesive. We would suggest passing a piece of thin stiff card through the machine after every 10 laminations.

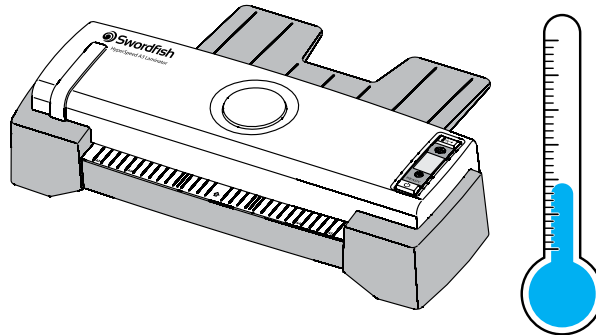

The side from your cereal packet would be ideal.

This regular maintenance will help prevent jams caused by sticky rollers.

12

Allow the machine to cool down completely before attempting to move it.

Failure to do so could cause serious damage to the machine.

PENCIL SHARPENERS & ERASERS

From a small pocket sharpener to electric machines that can sharpen 15 pencils a minute, Swordfish are the experts. Our sharpeners have been designed to meet individual needs. Sharpeners that have their blades retained by tamper-proof screws are ideal for school kids, whilst electric sharpeners that can handle a variety of different pencil diameters are a boon to busy teachers. We even have a fully automatic, hands-free sharpener that takes the hard work out of sharpening lots of pencils.

Artists who use specialist pencils are pleased to see that we test all our mechanical and electric sharpeners on a range of these pencils – and publish the results, taking the guesswork out of choosing the right machine.

Replacement Blade Code: 40907

tried & tested technology

OmniPoint Mechanical Pencil Sharpener

- Pencil point options for a rounded or sharp tip
- Very large capacity shavings tray
- For standard (8mm) up to large (12mm) diameter pencils
- Desk clamp included

Code: 40305

Replacement Blade Code: 40306

Scribbler Battery-powered Pencil Sharpener

- Portable, compact and handy
- Automatically sharpens when pencil is inserted
- Safety feature cuts power when tray is removed
- Sharp blade sharpens in seconds
- For standard (8mm) diameter pencils
- Requires 4 x AA batteries (not supplied)

Code: 40003

VariPoint Mini Dual Power Pencil Sharpener

- For standard (8mm) diameter pencils
- Adjustable pencil points
- Auto Stop prevents over-sharpening
- Replaceable blade unit
- Safety off feature when tray is removed
- Powered by USB cable (inc.) or 4 x AA batteries (not inc.)
- Sharpens up to 6 pencils per minute

Code: 40304

Fusion² Dual Power Pencil Sharpener

- Battery or mains operated
- Pencil point sharpness selector - from blunt to sharp
- Broken tip removal button
- Safety feature cuts power when the shavings tray is removed
- Strong, sharp helical blade
- For standard (8mm) and large (10mm) diameter pencils
- Option of 6 volt PSU (Power Supply Unit) included or 4xAA batteries (not supplied) for portability

Code: 40309

VertiPoint Electric Pencil Sharpener

- Vertical design for easy one-handed sharpening
- Strong, sharp helical blade
- Fast 7-second sharpening
- Double safety interlock
- Large capacity shavings tray
- Small footprint saves desk space
- For standard (8mm) diameter pencils
- Complete with 9 Volt power supply unit

Code: 40310

Replacement Blade Code: 40311

VariPoint Electric Pencil Sharpener

- Strong replaceable helical blade
- Auto-stop when sharp to prevent oversharpening
- Safety feature cuts power when tray is removed
- Pencil point options for a rounded or sharp tip
- For standard 8mm diameter pencils

Replacement Blade Code: 40236

tried & tested technology

MultiPoint Electric Pencil Sharpener

- Strong replaceable helical blade
- Sharpens up to 10 pencils per minute
- Auto-stop when sharp to prevent oversharpener
- Safety feature cuts power when tray is removed
- Four second sharpening
- For standard 6, 7, 8, 9, 10 & 11mm diameter pencils

Code: 40233

Replacement Blade Code: 40234

Contour Electric Pencil Sharpener

- Choice of pencil point options from rounded to sharp
- Sharpens up to 6 pencils per minute
- Automatically sharpens when a pencil is inserted and stops when it is removed
- Auto-stop when sharp to prevent oversharpener
- Safety feature cuts power when tray is removed
- Effective thermal cut-out to protect the motor
- A jam eject button enables broken leads to be removed with ease.
- For standard (8mm) diameter pencils

Code: 40051

Replacement Blade Code: 40806

Sketch Electric Pencil Sharpener

- Automatically sharpens when a pencil is inserted and stops when it is removed
- Sharpens up to 12 pencils per minute
- Auto-stop when sharp to prevent oversharpener
- Safety feature cuts power when tray is removed
- Effective thermal cut-out to protect the motor
- Strong, sharp replaceable helical blade
- Suitable for all types of pencil
- For standard (8mm) diameter pencil

Code: 40050

Replacement Blade Code: 40805

Trio Electric Pencil Sharpener

- For standard 8mm, 9.5mm and 11mm diameter pencils
- Automatically sharpens when a pencil is inserted and stops when it is removed
- Sharpens up to 15 pencils per minute
- Auto-stop when sharp to prevent oversharping
- Safety feature cuts power when tray is removed
- Effective thermal cut-out to protect the motor
- Strong, sharp replaceable helical blade
- Robust plastic body and capacious shavings tray

Code: 40906

Replacement Blade Code: 40023

AutoFeed Electric Pencil Sharpener

- Auto-feed and auto-eject when sharp
- Broken point ejector
- Variable point selector
- Pencil hole safety shutter
- Shavings tray with safety interlock
- Strong, sharp replaceable blade
- For standard 8mm diameter pencils

Code: 40327

AutoFeed Service Kit: 40328

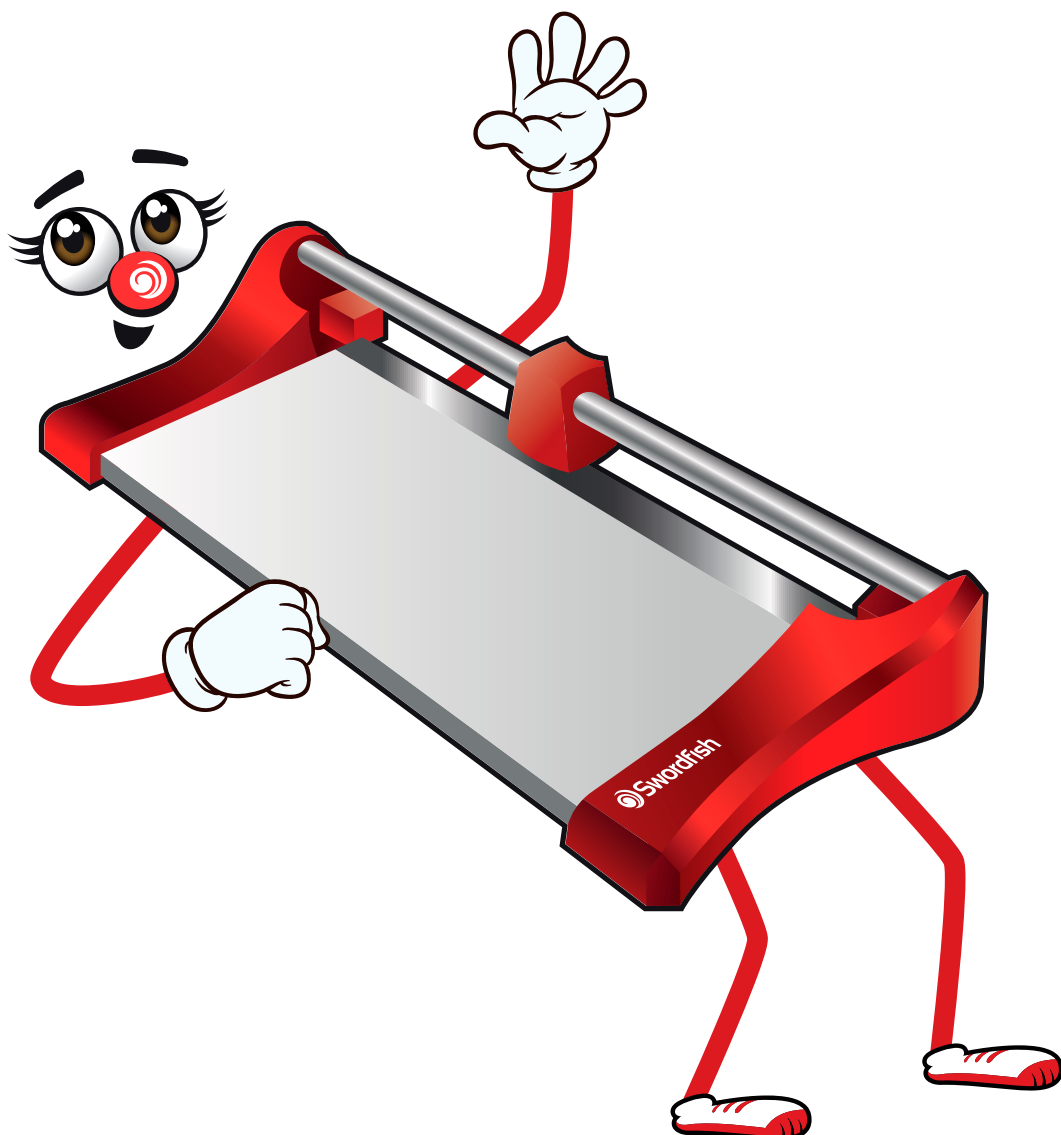

PAPER TRIMMERS

Rotary paper trimmers have largely replaced old-fashioned guillotines – and for good reason.

Trimmers are easier to use, more accurate and most importantly, safer.

It is virtually impossible for a user to cut their finger whilst using a trimmer. The only time that a trimmer blade is exposed is when it is being changed, when appropriate caution should be used.

Rotary trimmers have many applications, so the Swordfish range has been developed to meet all needs, from the home craft worker to busy offices, schools and studios and everything in between. Available in sizes ranging from A4 up to A2, Swordfish has a paper trimmer for all your cutting needs.

UP TO 8 SHEETS

UP TO 5 SHEETS

UP TO 5 SHEETS

UP TO 5 SHEETS

5 in 1 Creative Trimmer

- 5 different types of trim: straight, perforated, wave, score and round corners
- For paper and light card
- Rotating thumbwheel for easy blade selection
- No exposed blades

ELECTRICAL ACCESSORIES

Tablets and smartphones have ushered in a real revolution in portable communications. But these power-hungry devices need frequent charging. If you find that you never seem to have enough sockets to power all your essential electrical appliances and your smartphone, we have the answer - the Swordfish **VariPower** range.

Each product is designed to do a different job, but all have one thing in common - they are all equipped with high-output USB ports, so you no longer need to plug a charger into a socket - you simply connect a USB lead, leaving your sockets free.

Whether at home, in the office or on the move, the **VariPower** range is the easy way to power your life

Pencil Point Score - Graphite *	5	4	2	5
Pencil Point Score - Crayon *	5	5+	4	5
Pencil Point Score - Charcoal *	3	4	4	5
Pencil Point Score - Watercolour *	5	5	4	5
Pencil Point Score - Pastel *	4	5	4	4

*Pencil points score 0 - 5 (5 is best) for quality of point and wood finish

**Please note that pastel pencils are much more abrasive than graphite pencils and can cause sharpener blades to require frequent replacement

***Please also note that woodfire & wopax type pencils are much denser than natural wood pencils and will cause rapid wear to sharpener blades

Platignum

LONDON 1919

THE HISTORY of the pen is our history

Your handwriting says a lot about you – and so does the pen you hold. That's why over a century's experience as pen pioneers has led us to create this distinctive range of quality pens.

From the self-filling ranges we manufactured in 1919, we invented the world's first replacement nib, created the retractable ball-point in 1950 and introduced the first cartridge system.

We've been writing the history of the pen for generations and are continuing to innovate for the future.

ISN'T IT NICE TO BE ABLE TO HOLD HISTORY IN YOUR HAND?

1919

Platignum Pen Co. changes the world of pens with the self-filling, gold plated nib fountain pen.

1925

A revolution in pen design – the world's first replacement nib.

1939-1945

Platignum supports the war effort, commissioned by the MOD to create 'spy' pens concealing maps and compasses.

1950

Another breakthrough – the company invents the retractable ball point.

1962

The seminal Good Handwriting pen is introduced.

1965-1998

Platignum introduces the ink cartridge to the UK and becomes synonymous with education for over 30 years.

1992-2005

Platignum produces a collection of calligraphy sets to complement its traditional writing range.

2007

The Platignum Fine Writing brand is relaunched.

2011

Platignum's new signature style is born.

2012

Platignum decreased its packaging to reduce its carbon footprint & be more environmentally friendly.

2016

Tixx range launched.

2020

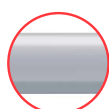

New S-Tixx range launched.

S-Tixx ✓
